AO Scan Technology by Solex is an elegant, yet simple-to-use frequency technology based on Tesla, Einstein, and other prominent scientists' discoveries. It uses delicate bio-frequencies and electromagnetic signals to communicate with the body. The AO Scan Technology assesses 170,000 points against a library of over 120,000+ unique Blueprint Frequencies and created a hand-held technology that allows the AO Scan app user to compare individual's frequencies to these Blueprints in order to help achieve homeostasis, the body's natural state of balance. And the best of all, the body receives optimizing frequencies during each scan.
