Navneet Metal Corporation is one of the exporters, manufacturers, and suppliers of the high-quality aluminium tubes and pipes. We manufactured pipes and tubes with the help of good quality raw materials. We also offer seamless, pipes and tubes. The aluminium pipes and tubes are available in different dimensions and specifications according to the requirements. Aluminium pipes and tubes have some specifications, like their standard, size, length, an outer end, form, grade, type, thickness, outer diameter. There is a difference between pipes and tubes, no doubt, pipe, and tube look similar, but there is a difference in their nomenclature and size. Pipes and tubes are interchangeable but in a very few cases. The difference includes the following factors, the size, the shape of the pipe is always rounding, and the tube can be square, round or rectangular.
