China Pulse Dust Gas CO2 Sensors Co., Ltd. (www.pulse-sensors.com) specializes in the manufacture of air quality sensors and has launched a wide array of air quality concentration detection equipment. Our product range includes laser dust sensors, infrared dust sensors, CO2 sensors, TVOC detection modules, formaldehyde sensors, and all-in-one detection modules, designed for use in a variety of smart home appliances and environmental monitoring instruments. Our products are highly regarded by both domestic and international customers. At Pulse, we uphold the principle of "customer first, quality uppermost" and strive to create a safe and healthy living environment for people. We produce superior air quality sensors that are compatible with a wide range of air and environmental purification equipment. By focusing on technological innovation and continuous improvement, we ensure that our products meet current needs while being more user-friendly.
