👤 Freelance Marketplace Script to Build a Custom Freelancer Clone

📍

Our freelancer clone script has everything you need to build a user-friendly, intuitive, and successful freelance marketplace. Having a secured coding structure, it's completely bug-free, reliable, and easy to launch. Also, it comes with multiple accessible features that can be fully customized to fit your specific business needs! Take a look at its top-notch features: ? Simple Registration And Login: Both freelancers and clients can easily create accounts and log in to your freelance website separately. ? Project And Job Listing: Recruiters can list jobs and post project requirements, mentioning the deadline, budget, and other necessary details. ? Bid Submission: Freelancers can bid on the listed jobs, mentioning their timelines and proposed charges. ? Safe Payment Gateway Integration: Our script comes with safe payment integration, ensuring smooth, transparent, and secured transactions. ? Escrow Payment System: Our script holds funds in escrow and releases them once the project is done and both parties are satisfied with it. ? Rating & Review System: Both freelancers and clients can share their experience and rate each other once a project is accomplished Apart from this, the script comes with a free installation service and one year of maintenance support. Our dedicated script developers provide routine updates and security patches, ensuring the optimal performance of your freelance platform.
