Exodesk, as a managed service provider, offers VoIP services in collaboration with 3CX, a popular software-based PBX system. Here's an overview of their VoIP services with 3CX:

- **Hosted 3CX PBX:** Exodesk provides managed hosting for 3CX PBX, a software-based private branch exchange (PBX) system that enables VoIP communication within businesses. This eliminates the need for businesses to host the PBX system on-premises.
- **Unified Communications:** With 3CX, Exodesk integrates unified communications features such as voice calls, video conferencing, instant messaging, and more into a single platform. This enhances collaboration and productivity among employees.
- **3CX Phone Systems:** Exodesk offers IP-enabled phone systems compatible with 3CX, providing advanced telephony features like call forwarding, voicemail, call recording, and mobile integration for seamless communication.
- **Mobile VoIP:** Businesses using Exodesk's 3CX VoIP services can access mobile VoIP solutions, allowing employees to make and receive calls using their smartphones over the internet, even when outside the office.
- **VoIP Security:** Exodesk implements robust security measures in collaboration with 3CX to protect VoIP networks against threats such as unauthorized access, eavesdropping, and denial-of-service (DoS) attacks.
- **Quality of Service (QoS) Management:** Exodesk optimizes network performance and prioritizes voice traffic through effective QoS management, ensuring high-quality voice calls and minimizing latency issues.
- **Support and Maintenance:** Exodesk provides ongoing technical support, system updates, and maintenance for 3CX VoIP services, ensuring smooth operation and addressing any issues promptly.

By combining Exodesk's managed services expertise with the feature-rich 3CX PBX system, businesses can benefit from cost-effective, scalable, and secure VoIP communication solutions tailored to their needs.
