The kids Smart Watch GPS Tracker is enabled for Phone calls, Instant Messaging, Web Browsing and Music playback. It is our most popular Kids SMART Watch to date, going by the functions on the device. Its positioning is considered to be of the higher tier, boasting of 3D Positioning system (GPS + LBS + WiFi Localisation), an RDP Inertia sensor, an accelerometer and a Gravity Sensor. It's faster than its predecessors, with 4G connectivity in replacement to the basic 2G GSM technology on older models. More fun with a 3Mega Pixel camera which enables it for video calls between you & your child and HD Photo Capture. The Kids Smart Watch GPS Tracker works with SE Tracker app which is compatible with both Android & iOS devices, but does not need a smart phone to function. It is unlocked and therefore compatible with sim cards from any network. A sim card isn't required to get the watch working, but required for most of its functions e.g. location tracking or making/receiving phone calls. Any network, in any part of the world. This is a 4G GPS Smart Watch and a Cell Phone wrapped in one, a superb choice for personal safety. You can track its location in real time anywhere anytime. Phone call & Video call: Besides serving as a GPS tracker, this watch can also work as a cell phone to make phone calls and video calls. When you go to SIM operator stores, sales guys may tell you our watch can not support their SIM cards. No worries about this, as long as you make sure the SIM is with data plan and voice feature, just contact us immediately, we can help you get the watch worked at once. IP67 Waterproof: This GPS watch is IP67 waterproof rated. IP67 means the unit can be dropped into a body of water up to a meter deep for half an hour, while IP68 guarantees protection in water up to 1.5m deep for the same period of time. Both ratings are resistant to dust. Electronic Fence Alarm(Geo-fence): You can set a safe area centering around the watch wearer, the watch will automatically raise an alarm in your phone application once the watch wearer leaves the area. You can also track multiple watches at the same time. SOS emergency call: Users can just press SOS button to circularly call family numbers for help in case of an emergency. Voice chat: The watch and parents' cellphone can send voice messages to each other. Historical Route Track(Footprint Record): Past locations of the GPS watch in latest 1 month will be stored in system for your future checking. Camera and Video Calling: Support photo taking, and video calling.
