Wall Series Louvre Roofs are fixed to a structural exterior wall, which supports the roof without the need for support columns (against the wall), that may obstruct windows, doors or walkways. This is especially useful for small or awkward spaces, and opens up a world of choices for outdoor living areas. A freestanding Bask louvre roof is a self-supporting structure that immediately creates an outdoor living room wherever you need a stylish and flexible shelter for your home. Designed by Kiwis for NZ homes, Bask freestanding louvre roofs are built for year-round use, to extend your outdoor living options. <https://www.conceptblindsandshutters.co.nz/outdoor-products/louvre-roof/>
