Stainless steel coil is used to manufacture products in a variety of industries where extreme conditions may exist such as marine, oil & gas, chemical processing, power generation, food processing, wastewater and other applications. Stainless steel coils are also used in various architectural applications and sheet metal component manufacturing industry. Stainless steel coils can be easily formed into various shapes, and polished as per customer requirements, making it the most important raw material for sheet metal component industry. Steel Pipes and Tubes is a stockist, supplier and exporter of high quality stainless steel coils as per ASTM A240 in various sizes and grades such as SS 430, SS 410, SS 201, SS 202, 304/304L, 316/316L, 321/321H, 347/347H & Duplex 2205. Due to its anti-corrosive properties, stainless steel coils have become essential in the composition of parts for the medical, tooling, mechanical and food industries.
