Do you spend too much time managing provisional tax? Tax Traders is here to help with their progressive tax pooling system. Since 2011, Tax Traders has been helping Kiwi business owners, sole traders, and contractors maximise their time and minimise their tax bills. As an IRD tax pooling intermediary, Tax Traders provides a safe, easy and transparent way to pay provisional tax. Tax pooling is a system of paying tax into a pool rather than directly to the IRD. When taxpayers know exactly how much they need to pay, Tax Traders transfers funds out of the pool to clear tax obligations. If you've underpaid, you can purchase tax from within the pool for a fee less than the IRD debit interest rate. If you've overpaid, you can sell your surplus tax for a profit. Tax Traders make paying provisional tax simple and flexible. Pay when it suits cash flow, smooth tax over equal payments, delay an upcoming payment, and manage missed payments from Tax Traders' sophisticated digital platform. Free up cash flow and your time. Visit the website or call the friendly team on 0800 TAX TRADERS.
