Wilderness Valley honey comes from a spectacular, remote and untouched ecosystem that is as pure as the honey we produce. Nestled in New Zealand's King Country's wild hills and glistening rivers is Ruatiti Station, a honey-making utopia and the 5,000 acres of paradise we call home. Wilderness Valley Manuka honey comes in four UMF certified grades, including 8+, 10+, 13+, and 15+. We guarantee that the Manuka honey in our jars is always true to the label. Our spectacular, native Manuka bush located in the remote regions of New Zealand makes Wilderness Valley a honey-making utopia, enabling us to produce a range of UMF™ Manuka honey products that people love around the world. <https://wildernessvalley.co.nz/>
